

# Centrifugal Water Separators

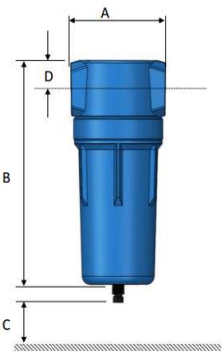

## FP Series

DS Filtration is now offering a range of centrifugal water separator from 1/2" bsp 54cfm to 2 1/2" bsp 1040cfm, which will complement our FP series compressed air filter range.

Compressed air is a fundamental component of pneumatic systems, correct air treatment is essential to reducing operational costs including spoilage, downtime and maintenance as well as protecting tools and equipment. This water vapour can be removed using condensate drains, however for systems and applications where water contamination is a major issue then the FP Series Centrifugal water separators will remove up to 99% of the water aerosol in compressed air.

FP Series Centrifugal water separators range specifications are below:

Model Number	BSP (inch)	Flow (scfm)	Weight (kg)	Dimensions (mm)			
				A	B	C	D
FP12WS	1/2"	54	2	87	212	60	21
FP30WS	1"	141	4	126	288	100	34
FP80WS	1 1/2"	365	5	126	480	140	34
FP105WS	2"	532	9	166	575	150	50
FP150WS	2"	711	12	166	710	200	50
FP200WS	2 1/2"	1040	15	166	950	300	50

Maximum working pressure 16bar  
 Maximum temperature 60°C  
 Nominal pressure drop less than 5kpa

## Features and Benefits

- Easy to install and maintenance free (no components require replacing).
- No refrigerant, desiccant or electricity required.
- Versatile, protecting an entire air system or a single tool.
- Cost effective, removing the bulk of the water from the compressed air.
- Long lasting with a solid aluminium body.
