

HYD Series

Refrigerated Compressed Air Dryers

DS Filtration is pleased to announce a new series in our refrigerated air dryer range. The HYD series of Refrigerated Air dryers have models ranging from 20cfm to 6000cfm.

Designed and constructed using the highest standards and materials, the HYD series offers superior performance, reliability, durability and most of all great value. They can be integrated into any compressed air system where clean dry air is required and compliment our FP series range of Compressed Air Filters.

The HYD range has several design advantages and features that include:

- *Compact and space saving design.
- *Easy to remove panels for access to internal components for maintenance.
- *Minimal pressure drop.
- *Ultra-compact and highly efficient aluminum heat exchanger.
- *Environmentally friendly refrigerant.
- *Manufactured to deliver performance to ISO 7183 industry standards.

Having the right dryer can increase productivity, whilst reducing operational costs including spoilage, downtime and maintenance. The wrong size dryer can end up costing you time and money - to make sure you have the correct dryer for your air system call the DS Filtration team on 03 8719 5249 or drop us an email to dsfiltration@bigpond.com

The complete HYD series are now available in store, please feel free to drop in to our Boronia warehouse, have a cuppa and look at the all new HYD Series range of Refrigerated Compressed Air Dryers.
