

NED Range

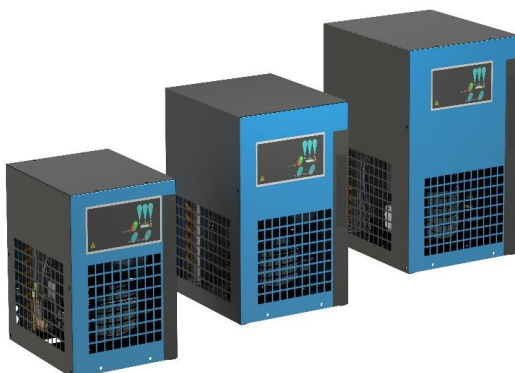

Refrigerated Compressed Air Dryers

Our NED range of refrigerant air dryers are reliable, cost effective and easy to install!

Designed for the efficient and effective removal of moisture in compressed air applications. We have a wide range of dryers with flow rates from 20 to 4238 cfm.

Having the right dryer can increase productivity, whilst reducing operational costs including spoilage, downtime and maintenance.

The NED series allows easy installation, inspection and maintenance.

Complimenting our NED Refrigerated air dryers range is our FP Series of Compressed Air Filters.

Used for the efficient removal of solid particles, oil aerosol and water from compressed air systems.

Our FP series consist of aluminium housings with an epoxy coating to prevent corrosion, they come complete with a 'push fit' element and automatic drain.

We have filter and dryer combinations suitable for any compressed air system. Call us today 03 8719 5249 to discuss your needs.

NED FEATURES

- Compact and space saving design.
- Easy access to internal components for maintenance.
- Low pressure drop.
- Ultra-compact aluminium heat exchanger.
- Energy saving mode.
- Automatic condensate drain.
- High and low pressure safety devices coupled with alarms to prevent the damage to the dryer.
- Manufactured in accordance to ISO 9001.
- User friendly control panel.
